BALUSTERS

 **Pro Tip:** Customizable in shape, height, and style (e.g., Tuscan, Colonial, Modern)
Compatible with stucco and EIFS systems

ARCHITECTURAL FOAM ▶ **BALUSTERS**

Lightweight decorative replicas of traditional stone or concrete balusters. Used primarily for aesthetic purposes, not structural support. Installed on balconies, staircases, patios, and entryways to enhance architectural detail.

KEYSTONES

 **Pro Tip:** Adds visual interest and symmetry to architectural facades

ARCHITECTURAL FOAM ▶ KEYSTONES

Decorative elements that mimic the appearance of traditional keystones. Typically used to add elegance and architectural detail above arched windows, doors, or garage openings. Not structural — purely for aesthetic enhancement. Available in various styles, from sleek and modern to ornate and classical.

STYLE 5

QUOINS

 **Pro Tip:** Customizable in size, shape, and style to match modern or classical aesthetics

ARCHITECTURAL FOAM ▶ QUOINS

Decorative corner elements that give the appearance of traditional masonry. Used to enhance the visual strength and elegance of building corners. Made from lightweight foam, coated for durability, and compatible with stucco and EIFS systems.

STYLE 5

ARCHES

 **Pro Tip:** Customizable in size, shape, and style to match modern or classical aesthetics

ARCHITECTURAL FOAM ▶ ARCHES

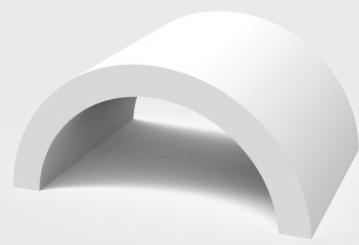

Foam arches are lightweight, decorative elements designed to replicate the look of traditional arched architectural features. They are typically installed above windows, doors, entryways, or garage openings to add a refined, elegant, or classical touch to a building's facade.

SPECIAL SHAPES

 **Pro Tip:** Customizable in size, shape, and style

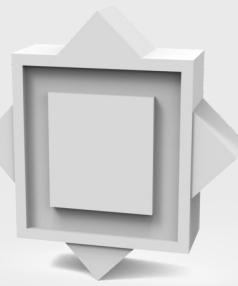

ARCHITECTURAL FOAM

► **SPECIAL SHAPES**

Foam special shapes refer to custom or non-standard architectural elements made from lightweight foam (usually EPS) that are designed to match unique design needs. These can include custom trims, moldings, ornaments, medallions, or curved elements not found in standard product catalogs.

WALL CAPS

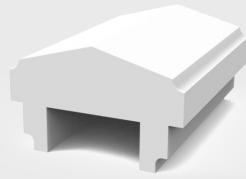

Pro Tip: For all architectural designs such as columns parapet caps, cornices, reveals or arches, our in-house design team can help you make the right choice for your construction project.

ARCHITECTURAL FOAM ▶ WALL CAPS

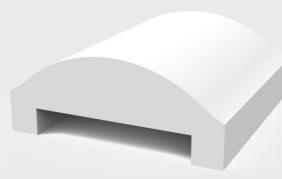

Foam wall caps are decorative and protective toppers placed along the top of masonry or stucco walls, gates, or pillars. They provide a finished look while helping to protect the structure from water intrusion and weather damage.

PARAPETS

Pro Tip: For all architectural designs such as columns, parapet caps, cornices, reveals or arches, our in-house design team can help you make the right choice for your construction project.

ARCHITECTURAL FOAM ▶ PARAPETS

Commonly seen on flat-roofed buildings. Used to hide rooftop equipment, provide wind protection, and improve the aesthetic appearance of the roofline. Often finished with foam cornices, wall caps, or custom trim to add visual interest

MANTELS

 **Pro Tip:** For all architectural designs such as columns, parapet caps, cornices, reveals or arches, our in-house design team can help you make the right choice for your construction project.

ARCHITECTURAL FOAM ▶ MANTELS

Inspired by Greek and Roman architecture, pediments add visual emphasis and symmetry. Can be simple or ornate, depending on the design style (e.g., classical, colonial, modern)

ROOFING INSULATION

Pro Tip: All shapes come in 96" lengths standard, but can be cut to 48" lengths as well

ARCHITECTURAL FOAM ▶ CORNICE

A roofing insulation EPS sheet is a rigid foam panel made from Expanded Polystyrene (EPS), used as an insulating layer in flat or low-slope roofing systems. These sheets help improve a building's thermal efficiency, reduce energy costs, and provide a stable substrate for roofing materials.
